Professional Summary

- 5+ years of experience across **data analysis, business analysis, business intelligence**, and **systems analysis** in public, private sector and enterprise environments
 - Strong expertise in **SQL, Python, Excel, Power BI**, and **Tableau** for data analysis, reporting, and dashboard development
 - Skilled in **HTML, CSS, SQL**, and **Power BI**, with experience managing website content, page redirects, and analytics for optimization.
 - Hands-on experience working with **ERP systems, CRM data**, and **operational databases** to support decision-making and compliance
 - Proficient in **business process analysis, workflow automation**, and **functional testing** for enterprise systems such as Tyler Technologies' ERP, New World, and Banner-style SIS.
 - Strong understanding of **KPIs, metrics definition, data quality**, and **process optimization** using data-driven approaches
 - Skilled in developing interactive dashboards using **Tableau, Power BI, SSRS, Crystal Reports**, and **Cognos** for executive-level visibility.
 - Experienced in end-to-end analytics lifecycle including **data extraction, transformation, validation, visualization**, and **stakeholder presentation**
 - Strong knowledge of **Agile** methodologies, project management tools (**Jira, Confluence, Azure DevOps**), and software testing.
 - Adept at **collaborating** with **cross-functional** teams including IT, operations, leadership, and vendors in fast-paced environments
 - **Lean Six Sigma Green Belt** certified, demonstrating expertise in process improvement and operational excellence.
-

Education

Master of Science in Information Systems
Central Michigan University, Mt Pleasant, MI, USA
GPA: 3.72/4.00

August 2022 – May 2024

Bachelor of Technology in Computer Science
CMR Technical Campus, Hyderabad, India
GPA: 3.55/4.00

September 2014 – June 2018

Professional Experience

Systems Analyst I

January 2025 - Present

Unified Government of Athens-Clarke County, Athens, GA

- Perform detailed **systems** and **data analysis** across jail and public safety operations to support compliance, reporting, and operational efficiency
- Developed automated reports and dashboards using **Power BI** and **SQL** to support corrections and jail operations, reducing manual effort by 40%.

- Develop **complex SQL queries** and **ad-hoc reports** to support leadership, department heads, and regulatory reporting needs
- Conduct reporting through **data analysis** and **mapping**, utilizing decision support software to deliver actionable insights to stakeholders and leadership.
- Collaborated with **Tyler Technologies ERP** and **New World** systems to generate performance data and service KPIs.
- Troubleshoot **data, system, and integration issues** involving **databases, applications, and interfaces**
- Support and maintain BI tools (**SSRS, Crystal Reports, Cognos**) and custom dashboards for operational insights and performance tracking.
- Analyze operational data and system logs to identify **trends, bottlenecks, and opportunities** for **process improvement**
- Contribute suggestions for **ERP maintenance** and reporting enhancements, based on end-user feedback and operational trends.

Digital and Devices Associate

September 2019 – July 2022

Amazon, Hyderabad, India

- Extracted and analyzed operational datasets using **SQL** to **track performance, defect patterns, and customer-impact metrics**.
- Developed **SQL scripts** and **Power BI** dashboards to monitor performance KPIs, reducing manual analysis time by **30%**.
- Provided data-driven support to **customer service** teams by analyzing device performance issues and user experience trends.
- Acted as a **Subject Matter Expert (SME)** in device troubleshooting and customer interaction quality, mentoring new hires and ensuring adherence to CX standards.
- Developed **SQL queries** and **Excel-based reports** to identify service pain points and improve first-contact resolution rates.
- Built **interactive dashboards in Power BI and Tableau**, supporting key performance measurements and decision-making for business teams.
- Collaborated with **internal analytics** teams to identify customer pain points and process inefficiencies, leading to **targeted experience improvements**.

Data Analyst

March 2019 – August 2019

Clasc, Hyderabad, India

- Conducted **data analysis** and **reporting** to support product and business decision-making
- **Designed** and **automated SQL-based reports**, improving data accuracy and delivery timelines
- Conducted **A/B tests** and **behavioral analysis** to guide interface improvements and feature engagement.
- Performed **data quality** assessments and implemented **validation checks, reducing discrepancies by 30%**
- Worked in **Agile environments**, delivering insights aligned with evolving business requirements
- Built automated **SQL/Python** reports to improve timeliness and reliability of business insights.

Business Analyst

April 2018 – February 2019

Republic Tools, Hyderabad, India

- Analyzed **operational and financial data** to support workshop performance and capacity planning

- Developed and maintained **reports and dashboards** to visualize key performance metrics, reducing production downtime by **20%**.
 - Collaborated directly with product users (machinists and managers) to improve **UI design** and **process flows**.
 - Monitored **KPIs**, achieving a **15% increase in productivity**.
-

Skills

Data & Analytics: SQL, Advanced Excel, Python, Data Analysis, Statistical Analysis, KPI Development, Ad-hoc Analysis

Business Intelligence & Reporting: Power BI, Tableau, SSRS, Crystal Reports, Cognos, Dashboard Design, Executive Reporting

Databases & Data Engineering: SQL Server, MySQL, ETL Pipelines, Data Validation, Data Quality Checks, AWS, Azure

Business & Systems Analysis: Requirements Gathering, Process Mapping, Workflow Optimization, Systems Analysis, UAT, Functional Testing

Tools & Platforms: Jira, Confluence, Azure DevOps, REDCap, ERP Systems, Decision Support Systems

Compliance & Governance: CJIS Compliance, HIPAA Awareness, Access Controls, Data Security, Audit Support

ERP & Systems: Tyler New World ERP/Enterprise Mobile (JMS), permissions, testing, UAT

Web Technologies: HTML, CSS, SEO

Programming & Tools: Python (Pandas, NumPy, Scikit-learn), SQL, Excel (Advanced), Jupyter

Certifications

- Lean Six Sigma Green Belt
 - Microsoft Certified: Azure Data Engineer Associate (in progress)
 - Celonis Process Mining - From Theory to Execution
-

Projects

Book Recommendation System

- Developed a system using **Python, Tkinter, and MySQL**, enhancing user engagement with personalized recommendations.

ERPsim Manufacturing Company Project (SAP)

- Collaborated to create an **Executive Planning Report** for ERP simulation using **SAP**, leading to a **25% increase in simulated revenue**.

YouTube Data Analysis

- Built a **data lake on Amazon S3** and developed **ETL jobs using AWS Glue and Spark**, resulting in a **15% improvement in viewer engagement** through interactive Power BI dashboards.

Pharma Life Project

- Developed a desktop application for pharmaceutical management using **Python, Tkinter, and MySQL**, improving inventory tracking and **sales reporting efficiency by 40%**.
